WATER-BASED PORTABLE EXTINGUISHERS

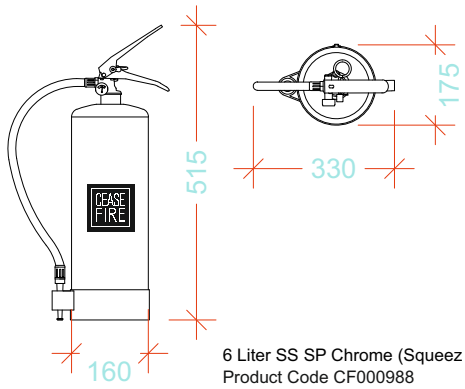

PRODUCT OVERVIEW

When a fire breaks out, there are bigger dangers than the ones you can see. The rising temperature of fuel around the fire, paper, and cloth are the best examples. Water is the only extinguishing agent that can instantly bring down the temperature of the fire and the area around it.

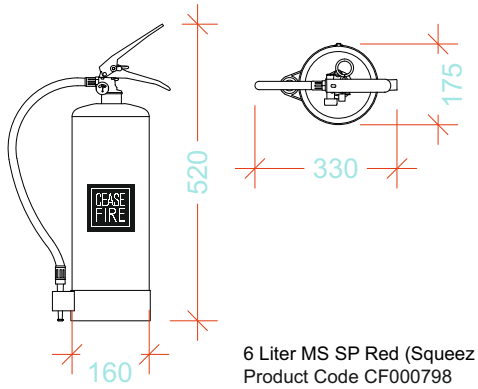

Ceasefire's water extinguishers use proprietary stored pressure technology, delivering a high power throw of water. It makes them more effective against the fire and allows the firefighter to stay at a safe distance from the flames. They are also packed with all the trademark features that make Ceasefire the fastest, safest, and most user-friendly extinguishers in the market today. Every Ceasefire extinguisher has ISO 9001 and CE certifications and conforms to ISI standards.
