WET CHEMICAL-BASED PORTABLE EXTINGUISHERS

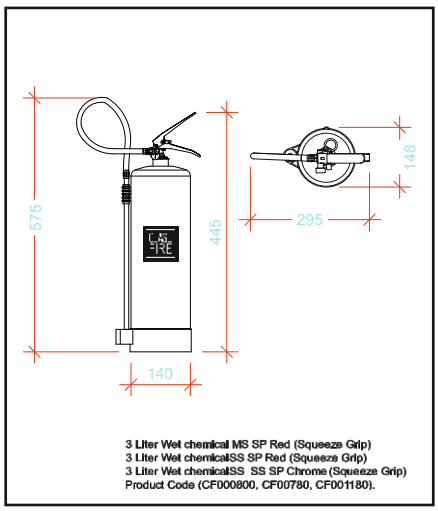

PRODUCT OVERVIEW

There is no denying the fact that fire is central to cooking. Every day, restaurants, cafes, bakeries, and commercial kitchens use it to create a myriad of delicacies. However, the liberal use of fire and the presence of combustible substances like oil make it a vulnerable spot for accidents to flare up.

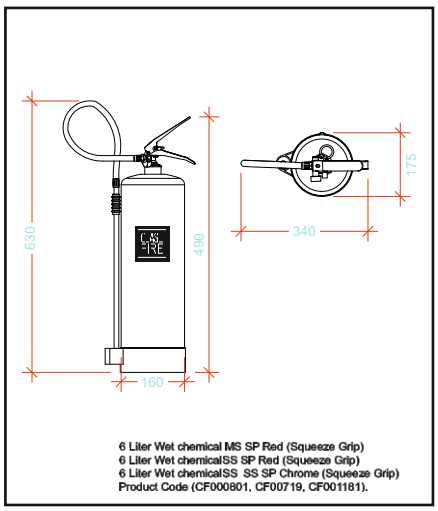

Ceasefire's Wet Chemical-based Fire Extinguishers are designed especially to fight oil and fat fires in kitchens. The extinguishing chemical is a foaming agent that fights Class A, B, and F fires. It is also environmentally friendly as it's more than 99% biodegradable! When launched at a fire, the wet chemical extinguishing agent has a blanketing effect on the flames, cutting down the supply of oxygen and cooling the oil below the self-ignition point. Being a de-greasing substance, the extinguishing agent ensures that the kitchen can be cleaned easily post-fire.
