

MINI PRO - STORED PRESSURE

INTUITIVE (PRODUCT OVERVIEW)

Small in size but not in might. Being the smallest suppression system - Mini has enough might to fire secure small enclosed spaces. Ceasefire Mini-Intuitive System being a direct suppression system protects the enclosed micro-environment from inside. As soon as it is mounted on the inner wall of the micro-environment, the Mini is instantly ready to safeguard. Mini being fully automatic can detect, actuate, and suppress fires without any form of human intervention. At the same time, it is available in Fluroketone which happens to be a cold gas, therefore, extinguishes fire by absorbing heat from it. After being sprayed it leaves behind no residue and works on class A, B, C, and Electrically started fires.

The clean agent based variant does not fall under the ambit of the F-Gas Regulations
